PATENT  
Atty. Docket No. 600189.095

**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

In re Application of : Daniel Mattias Larson, et. al.  
Application No. : 09/802,114  
Filed : March 8, 2001  
Title : METHOD AND SYSTEM FOR INDEXING  
INFORMATION AND PROVIDING SEARCH RESULTS  
FOR A SEARCH INCLUDING OBJECTS HAVING  
PREDETERMINED ATTRIBUTES  
Examiner : E. P. Leroux  
Art Unit : 2161

Commissioner for Patents  
P.O. Box 1450  
Alexandria, VA 22313-1450

**SUPPLEMENTAL AMENDMENT**

Sir:

In response to the Office Action dated March 4, 2009 and in response to the telephone discussion with Examiner Leroux, please reconsider the above identified application in light of the following supplemental amendment, wherein:

**Amendments to the Claims** begin on page 2 of the paper; and

**Remarks** begin on page 7 of this paper.

PATENT  
Atty. Docket No. 600189,095

**AMENDMENT TO THE CLAIMS**

Please amend the claims are noted in the marked-up version of the claims listed below:

1. (Currently Amended) A method for providing at least one search result responsive to a search query comprising at least one search query term, the method comprising:

parsing a set of pages for a plurality of text and non-text indexable elements;

assigning a location identifier to one or more of the plurality of text and non-text indexable elements, the location identifier corresponding to a location of a given text and non-text indexable element in a given page from the set of pages and the location identifier is a pointer to the location of the given text and non-text indexable element;

storing the plurality of text and non-text indexable elements and the corresponding location identifier for the one or more of the plurality of text and non-text indexable elements in a computer readable medium as a plurality of records;

receiving the search query to request a stored record, the search query received from a user across a networked connection;

searching said plurality of records to determine text and non-text indexable elements that correspond to the search query;

transmitting at least one text element representation of said query result to the user across the networked connection; and

transmitting at least one non-text element representation of said query result to said user across the networked connection.

PATENT  
Atty. Docket No. 600189.095

2. (Previously Presented) The method of claim 1, wherein the non-text elements comprises an image.

3. (Previously Presented) The method of claim 1, wherein the record comprises a Webpage.

4. (Cancelled)

5. (Cancelled)

6. (Previously Presented) The method of claim 1, wherein the non-text indexable element comprises a sound file.

7. (Currently Amended) A method for indexing records in an index of the world wide web, the method comprising:

receiving a record from the world wide web;

parsing the record for associated text and a non-text indexable elements;

creating representations of the parsed text and non-text indexable elements;

assigning a location identifier to one or more of the representations of the parsed text and non-text indexable elements, the location identifier corresponding to a location of a given text and non-text indexable element in the record and the location identifier is a pointer to the location of the given text and non-text indexable element; and

storing the representations and the corresponding location identifiers in association with the record as a one or more word location pairs.

8. (Previously Presented) The method of claim 7, wherein the non-text indexable element comprises an image.

PATENT  
Atty. Docket No. 600189.095

9. (Previously Presented) The method of claim 7, wherein the record comprises a Web page.

10. (Cancelled)

11. (Cancelled)

12. (Currently Amended) A system for providing at least one search result responsive to a search query comprising at least one search query term, the system comprising:

a parse module for parsing the at least one record for text and non-text indexable elements and assigning a location identifier to one or more of the plurality of text and non-text indexable elements, the location identifier corresponding to a location of a given text and non-text indexable element in the at least one record;

an indexing module for indexing the text and non-text indexable elements and the corresponding location identifier for the one or more of the plurality of text and non-text indexable elements, the location identifier is a pointer to the location of the given text and non-text indexable element;

a query module for receiving the search query, the search query requesting at least one text and non-text indexable element in the world wide web, the search query received from a user across a networked connection;

a search module for locating corresponding text and non-text indexable element relating to the search query; and

a transmitter for transmitting a representation of the non-text indexable element and a text representation corresponding to the search query result to the user across the networked connection.

PATENT  
Atty. Docket No. 600189.095

13. (Previously Presented) The system of claim 12, wherein the object comprises an image.

14. (Previously Presented) The system of claim 12, wherein the record comprises a Web page.

15. (Cancelled)

16. (Cancelled)

17. (Previously Presented) The system of claim 12, wherein the object comprises a hyperlink to a sound file.

18. (Currently Amended) A system for indexing records in an index of an information network, comprising:

a parser for parsing a record for text and non-text indexable elements;

a database for storing said text and non-text indexable elements;

an query module for searching the database for a link to said non-text indexable elements appearing in the record;

a subsystem for creating a representation of the text and non-text indexable elements and assigning a location identifier to the representation of the text and non-text indexable elements, the location identifier corresponding to a location of a given text and non-text indexable element in the record and the location identifier is a pointer to the location of the given text and non-text indexable element;

a subsystem for storing the representation and the corresponding location identifier in association with the record; and

a subsystem for making an entry for the record in the index including the representation and the corresponding location identifier.

PATENT  
Atty. Docket No. 600189.095

19. (Previously Presented) The system of claim 18, wherein the object comprises an image.

20. (Previously Presented) The system of claim 18, wherein the record comprises a Web page.

21. (Cancelled)

22. (Cancelled)

PATENT  
Atty. Docket No. 600189.095

### REMARKS

In response to the non-final Office Action dated March 4, 2009, and the telephone discussion with Examiner Leroux, Applicants submit the present Supplemental Amendment, presenting additional support with the previously-filed response.

Applicants submit the present amendment to advance the present prosecution and pass the present claims to issuance. The amendments do not add any new matter, merely recite additional language regarding the claimed location identifier, consistent with the specification as originally filed.

As such, Applicants request entrance, examination and passage of the pending claims to issuance.

For at least all of the above reasons, Applicants respectfully request that the Examiner withdraw all rejections, and allowance of all the pending claims is respectfully solicited. To expedite prosecution of this application to allowance, the Examiner is invited to call the Applicants' undersigned representative to discuss any issues relating to this application.

Respectfully submitted,

Dated: June 11, 2009

THIS CORRESPONDENCE IS BEING  
SUBMITTED ELECTRONICALLY THROUGH  
THE PATENT AND TRADEMARK OFFICE EFS  
FILING SYSTEM ON June 11, 2009.

This Acknowledgement Receipt evidences receipt on the noted date by the USPTO of the indicated documents, characterized by the applicant, and including page counts, where applicable. It serves as evidence of receipt similar to a Post Card, as described in MPEP 503.

**New Applications Under 35 U.S.C. 111**

If a new application is being filed and the application includes the necessary components for a filing date (see 37 CFR 1.53(b)-(d) and MPEP 506), a Filing Receipt (37 CFR 1.54) will be issued in due course and the date shown on this Acknowledgement Receipt will establish the filing date of the application.

**National Stage of an International Application under 35 U.S.C. 371**

If a timely submission to enter the national stage of an international application is compliant with the conditions of 35 U.S.C. 371 and other applicable requirements a Form PCT/DO/EO/903 indicating acceptance of the application as a national stage submission under 35 U.S.C. 371 will be issued in addition to the Filing Receipt, in due course.

**New International Application Filed with the USPTO as a Receiving Office**

If a new international application is being filed and the international application includes the necessary components for an international filing date (see PCT Article 11 and MPEP 1810), a Notification of the International Application Number and of the International Filing Date (Form PCT/RO/105) will be issued in due course, subject to prescriptions concerning national security, and the date shown on this Acknowledgement Receipt will establish the international filing date of the application.
